

ONG AZIS SALIEM

Programmer

About Me

An undergraduate Computer Science student at Universitas Teknokrat Indonesia, specializing in Machine Learning, Computer Vision, and Embedded AI. Currently serving as Vice President of the Robotics Club, with a proven track record of integrating artificial intelligence into robotic systems and hardware. Equipped with technical expertise in data processing, model deployment, and cybersecurity, they are ready to drive research and technological innovation at the COE AI.

Skills

- Web Development
- Programming
- Hardware & Embedded
- Engineering Tools

Work Experience

Robotics & Coding Tutor (Part-Time)

Honeycomb English & Robotic
— Bandar Lampung

June 2026 – Present

- Teach core programming languages (Python and C++) alongside visual programming (Scratch) tailored for elementary and junior high school students (SD & SMP).
- Guide students through hands-on hardware integration and embedded systems development using Arduino and ESP32 microcontrollers with various sensors and actuators.
- Design interactive learning materials and project-based assignments to foster computational thinking, algorithm logic, and basic hardware troubleshooting.
- Adapt teaching strategies to bridge complex technical concepts for multi-age student groups, effectively monitoring individual learning progress.

Robotics Subject Teacher (Part-Time)

SMK Muhammadiyah 3 Metro

June 2026 – Present

- Teach core robotics, coding, and Internet of Things (IoT) concepts to 10th and 11th-grade students.
- Guide students through hands-on hardware integration, circuit design, and microcontroller programming.
- Lead the development of functional robotic products for the school, transforming theoretical concepts into tangible technological solutions.
- Develop a comprehensive IoT curriculum focusing on smart devices, sensor networks, and automation projects.

Leadership & Organizational Experience

Kontes Robot Teknokrat

Universitas Teknokrat Indonesia

2025 – 2026

• Project Manager / Chairman (2026)

- Led and coordinated a committee to organize and execute a campus-wide robotics competition.
- Managed event budgeting, technical preparations, and logistics coordination for all participating teams.

• Committee Member – Sumo Division (2025)

- Collaborated within the Sumo Robot Division to manage technical setups, arena preparations, and compliance checks.
- Ensured smooth event operations and fair matchmaking for all participating sumo robot teams.
- Communicated effectively with internal committee members and participants to maintain high-quality competition standards.

Vice Chair – Robotics Club **Universitas Teknokrat Indonesia**

2024 – Now

- Lead and coordinate the organization's internal management alongside the President to oversee all robotics research and development divisions.
- Oversee the progress of technology research projects, including the development of ESP32-based robots and the configuration of flight controller systems for unmanned aerial vehicles.
- Coordinate the preparation of campus delegations to participate in various regional and national robotics competitions.

Cyber Security Organization **Universitas Teknokrat Indonesia**

2024 – 2025

- Active member and CTF player, focusing on fundamental cybersecurity concepts and hands-on threat simulation.
- Achieved 1st Place in the Pesawaran Capture The Flag (CTF) Competition, solving practical challenges in basic web exploitation, cryptography, and digital forensics.
- Practiced basic binary exploitation and reverse engineering techniques to identify and analyze software vulnerabilities.

Awards & Achievements

3th Place – SAR Robot

2026**Unlimited Undip 2026 | Universitas Diponegoro**

- Team Leader, Mechanical Designer & Engineer
- Led a 5-member robotics team to secure 3rd place nationally against 12 competing universities.
- Designed 3D mechanical components and structural frameworks for a Hexapod robot using Autodesk Fusion 360.
- Assembled, tested, and calibrated mechanical systems to ensure stable and precise navigation in rescue simulations.

1st Place – VTOL Category (Region 1)

2025**Kontes Robot Terbang Indonesia (KRTI)**

- Designed, programmed, and optimized an autonomous VTOL drone to successfully complete mission-specific flight tasks.
- Competed against top universities in Region 1, demonstrating advanced skills in flight controllers, embedded systems, and aerial robotics.

First Place – Pesawaran Capture the Flag (CTF) Competition

2025**Diskominfo Pesawaran**

- Won first place in the Capture The Flag category of a cybersecurity competition, completing challenges related to vulnerability assessment, cryptography, and network security.

Education

Universitas Teknokrat Indonesia
Bachelor's Degree in Informatics Engineering

2024 – Present**SMAN 1 PESISIR SELATAN****2021 – 2024**
