

ONG AZIS SALIEM

Programmer

About Me

An undergraduate student in Computer Science at Universitas Teknokrat Indonesia, specializing in Machine Learning, Computer Vision, and Embedded AI. Currently serving as Vice President of the Robotics Club, with experience integrating artificial intelligence into robotic systems and hardware. Possesses technical expertise in data processing, model deployment, and cybersecurity, and is ready to fully contribute to research and innovation at the COE AI.

Skills

- Web Development
- Programming
- Hardware & Embedded
- Engineering Tools

Experience

Vice Chair – Robotics Club, Universitas Teknokrat Indonesia

2024 – Now

- Lead and coordinate the organization's internal management alongside the President to oversee all robotics research and development divisions.
- Oversee the progress of technology research projects, including the development of ESP32-based humanoid robots and the configuration of flight controller systems for unmanned aerial vehicles.
- Coordinate the preparation of campus delegations to participate in various regional and national robotics competitions.

Cyber Security Organization Universitas Teknokrat Indonesia

2024 – Now

- Active member and CTF player, focusing on fundamental cybersecurity concepts and hands-on threat simulation.
- Achieved 1st Place in the Pesawaran Capture The Flag (CTF) Competition, solving practical challenges in basic web exploitation, cryptography, and digital forensics.
- Practiced basic binary exploitation and reverse engineering techniques to identify and analyze software vulnerabilities.

Awards & Achievements

First Place – Pesawaran Capture the Flag (CTF) Competition

2025

Diskominfo Pesawaran

- Won first place in the Capture The Flag category of a cybersecurity competition, completing challenges related to vulnerability assessment, cryptography, and network security.

Committee Member – Kontes Robot Teknokrat Universitas Teknokrat Indonesia

2025

- Collaborated in a team to organize and execute a campus-wide robotics competition, ensuring smooth event operations and technical setups.
- Managed technical preparations, logistics, or participant coordination to support competitive matching between robotics teams.
- Communicated effectively with internal committee members and participants to maintain a high-quality event experience.

Education

Universitas Teknokrat Indonesia Bachelor's Degree in Informatics Engineering

2024 – Now

SMAN 1 PESISIR SELATAN

2021 – 2024
